Generative AI Engineer specializing in building end-to-end LLM solutions, from data ingestion to agent orchestration. Skilled with advanced prompt engineering, Python, FastAPI, LangChain, LangGraph, and Google Agent Development Kit (ADK). Proven ability to architect high-impact RAG systems and agentic workflows that have reduced prototyping development lifecycles by over 80%.

Work Experience

Maly Tech Ltd | Gen AI Engineer | Dubai, UAE

Aug 2024 – Nov 2025

- Deployed **Deloitte's AI Tax Assistant**, utilizing advanced prompt engineering and RAG to provide highly accurate MENA tax information, ingesting and indexing a proprietary knowledge base of hundreds of complex legal documents to ensure high fidelity.
- Architected the foundational **data ingestion pipeline** for the company's RAG architecture, automating the parsing and vectorization of diverse document formats (incl. PDF, DOCX, PPTX, TXT, MD) to power all AI applications.
- Built a modular service **AI4ALL**, incorporating scalable prompt templates and agent orchestration to accelerate the deployment of AI agents, significantly reducing the time-to-delivery for new AI solutions across the company from days or weeks to hours.
- Deployed **Luna**, a conversational AI assistant, leveraging RAG, prompt engineering, and context-injection to deliver safe, personalized answers to financial inquiries, successfully reducing routine customer support tickets by 80%.

Freelance | Angular Developer

Oct 2023 – Aug 2024

- Developed and maintained responsive web applications, implementing reusable UI components and integrating RESTful APIs to deliver tailored solutions.

Projects

Graduation Project | Fruitful Tree Count Management

2024

- Developed the core Computer Vision algorithms using Python and OpenCV to automate fruit tree counting and land cover detection from satellite imagery, achieving >90% accuracy.

Academic AI Projects

2021 – 2024

- Built computer vision, NLP, and classical ML systems, including hand gesture recognition (OpenCV), text classification, and income prediction (Scikit-learn).

Education

Damascus University | BS in Information Technology Engineering

2025

- Specialization:** Artificial Intelligence & Natural Language Processing.
- GPA: 3.78/4.0** (WES Verified U.S. Bachelor's Equivalent).

Skills

- AI:** ML, CV, NLP, LLMs, RAG, Agent Orchestration, Prompt Engineering, Knowledge Graphs.
- Frameworks:** LangChain, LangGraph, Google ADK, PyTorch, Scikit-learn, FastAPI, Angular.
- Tools:** Python, Java, TypeScript, PostgreSQL, MongoDB, Neo4j, Redis, Git, Docker.

Languages

Arabic: Native | English: Advanced
