

# Mostafa Alrahal

## Generative AI Engineer

US Permanent Resident | [+1 \(724\) 351-7270](tel:+17243517270) | [mostafa.kha.alrahal@gmail.com](mailto:mostafa.kha.alrahal@gmail.com)  
Pittsburgh, PA | [linkedin.com/in/mostafa-alrahal](https://www.linkedin.com/in/mostafa-alrahal) | [eng-mostafa-alrahal.github.io](https://eng-mostafa-alrahal.github.io)

Generative AI & Backend Engineer specializing in building production-grade LLM systems, RAG architectures, and multi-agent workflows. Collaborated on the development of Deloitte's AI Tax Assistant, delivering accurate MENA tax information through advanced prompt engineering and vector-based retrieval. Designed and deployed scalable FastAPI backends integrated with Google ADK and vector databases, architecting reliable, production-ready agentic AI solutions that cut prototyping lifecycles by over 80%. Seeking to leverage this experience to drive innovative AI products that accelerate time-to-market and enhance user outcomes.

## Work Experience

Maly Tech Ltd | Gen AI Engineer | Dubai, UAE

Aug 2024 – Nov 2025

- Collaborated with a cross-functional team to develop and deploy **Deloitte's AI Tax Assistant**, utilizing prompt engineering and RAG, and LangGraph to ingest and index a proprietary knowledge base of thousands of complex legal documents, delivering accurate MENA tax information that increased user confidence in tax guidance.
- Architected the core **data ingestion pipeline** for the company's RAG system, automating the parsing and vectorization of PDFs, DOCX, PPTX, TXT, and MD files using Docling and late chunking, which accelerated the creation of new agentic RAG applications.
- Built **AI4ALL**, a modular backend service utilizing advanced prompt engineering, and Google ADK (Agent Development Kit) for agent orchestration and tool calling, significantly reducing the time-to-delivery for new AI solutions across the company from days or weeks to hours.
- Develop **Luna**, a conversational AI assistant, leveraging RAG, prompt engineering (Few-Shot, ReAct), and context-injection to deliver safe, personalized answers to financial inquiries, successfully reducing routine customer support tickets by 60%.

Freelance | Angular Developer

Oct 2023 – Aug 2024

- Developed and maintained responsive Angular web applications using TypeScript, created reusable UI components, and integrated RESTful APIs, enabling faster feature delivery and improved user satisfaction.

## Projects

Graduation Project | Fruitful Tree Count Management

2024

- Developed the core Computer Vision algorithms using Python and OpenCV to automate fruit tree counting and land cover detection from satellite imagery, achieving >90% accuracy.

Academic AI Projects

2021 – 2024

- Built computer vision, NLP, deep learning, and classical and machine learning systems, including hand gesture recognition (OpenCV), text classification, and income prediction (Scikit-learn).

## Education

Damascus University | BS in Information Technology Engineering

2025

- Specialization:** Artificial Intelligence & Natural Language Processing.
- GPA: 3.78/4.0** (WES Verified U.S. Bachelor's Equivalent).

## Skills

- AI & ML:** Generative AI, Multi-Agent Orchestration, Prompt Engineering, Tool Calling, Knowledge Graphs, Large Language Models (LLMs), Retrieval Augmented Generation (RAG), Natural Language Processing (NLP), Computer Vision (CV).
- Frameworks & Libraries:** LangGraph, LangChain, Google ADK, PyTorch, Scikit-learn, OpenCV, Docling.
- Tools:** Python, Java, Typescript, FastAPI, Angular, PostgreSQL, MongoDB, Vector DBs (pgvector, Atlas), Graph DBs (Neo4j), Redis, GCP, Docker, Git, RESTful APIs, Streaming APIs (SSE, WebSockets).

## Languages

Arabic: Native | English: Advanced
